

French

Intent

In Key Stage Two, learning a modern foreign language allows children to increase their cultural capital and foster their curiosity of the world. Coherently planned French lessons follow our creative curriculum, giving children the opportunity for communicating for practical purposes in both speech and writing as well as building their confidence and resilience. Reading is at the core of our school and reading the French language broadens their vocabulary and develops their ability to understand new words. Additionally, learning a language enables them to compare and contrast their own language and provide them with prior knowledge as they transition into secondary education.

What?

Impact

Teachers' pedagogy

Providing teachers with CPD about how to structure and approach French lessons has increased confidence in the delivery of French teaching across KS2. As a result, teachers have taken ownership over planning and teaching French, and children have engaged effectively in these opportunities.

Awareness of effective teaching resources

Teachers and HLTAs have enriched children's experiences of learning French by engaging them in exciting, creative lessons. Teachers have accessed the resources provided which support them with the pronunciation of French words and the structure of an effective French lesson. As a result, children and teachers have broadened their French vocabulary and developed their confidence in their pronunciation of French words.
